## About SAP SI ...

### Innovative solutions and comprehensive services increase corporate value

SAP SI, a subsidiary of SAP AG, is a full-service provider. We cover all the phases of the life cycle of an IT System with our services. Our core skill is the integration of intra- and inter-industry SAP and non-SAP solutions. We have comprehensive industry, technology and solution know-how that equips us to do this.

## About Securinfo

Securinfo is a management-owned and privately financed software development company operated by ex-practitioners in audit and security who aim to enhance the business value of security through expert automated solutions. Securinfo licenses its products globally through its licensors in Europe, North America, Asia and Africa.

**Securinfo for SAP** is a corporate governance solution for customers using SAP® Systems and offers industry strength functionality to assist customers in delivering on their Sarbanes-Oxley, Basel II and IAS compliance obligations. The solution delivers a sophisticated methodology and supporting functionality by way of components that enable the integration of role management, user management and user permissions (authorizations) at the business process level. These components are subject to powerful inherent controls and are wrapped with change and risk management layers and supported by workflow.
